PROFESSIONAL SUMMARY

Software Engineer with nearly a year of experience building REST APIs and database-driven features for a CRM/ERP product using Python, Django, and SQL. Hands-on work across HRM (attendance & leave management), Superadmin (role-based access control), and CRM-IT modules (deal & territory management) for clients in the IT and education sectors. Experienced with Postman, Git/GitHub, and agile development workflows.

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, Django REST Framework (DRF), Flask, JavaScript, HTML5, CSS3

Databases: MySQL, SQL, ORM (Django ORM)

Tools & Practices: Git, GitHub, Postman, REST API Development, Role-Based Access Control (RBAC), Agile/Scrum

Domain: CRM/ERP Systems, HRM Software, Multi-tenant SaaS Applications

PROFESSIONAL EXPERIENCE

Backend Developer — Python / Django Sep 2025 – Present

Foyer Technologies Pvt. Ltd. | Chennai, Tamil Nadu | CRM/ERP Product (IT & Education Sectors)

- Developed and maintained RESTful APIs for the HRM module — employee attendance tracking and leave management — using Python, Django, and MySQL.
- Designed database schemas and Django ORM models for employee, attendance, and leave data, ensuring referential integrity and query efficiency.
- Built role and permission management APIs for the Superadmin module, enabling secure RBAC across multi-tenant CRM/ERP client accounts.
- Contributed to CRM-IT module development including deal management and territory management for enterprise clients in IT and education verticals.
- Validated API endpoints via Postman; identified and resolved defects before production release.
- Maintained feature branches and collaborated via Git/GitHub code reviews in an agile team environment.

TRAINING & CERTIFICATIONS

Python Full Stack Development — Practical Training Oct 2024 - Jul 2025

QSpiders Institute | Chennai, Tamil Nadu

- Hands-on training in Python, Django, Flask, SQL, HTML5, CSS3, and JavaScript — backend development, database design, and web fundamentals.

Industry Certifications

- AWS Certified – Cloud Computing | IBM Certified – Internet of Things | CISCO Certified – Network Essentials

PROJECTS

AI-Enabled Drone for Human Movement Detection

- Built a real-time human detection system using Python and CNNs, processing live video feeds from drone-mounted cameras for movement analysis.

Weather-Adaptive Street Lighting System (IoT)

- Developed an ESP32-based IoT system collecting real-time weather data (temperature, humidity, light) to dynamically adjust street lighting for energy efficiency.

EDUCATION

Bachelor of Engineering — Electronics & Communication Engineering Jul 2020 – Jul 2024

Ponnaiyah Ramajayam Engineering College | Thanjavur, Tamil Nadu | Aggregate: 80%
